Subject: RE: Silverton Media Inquiry

Laura – The actual score is considered deliberative until the rulemaking for the proposal is published so the score associated with the draft 2011 ranking is not publically available (nor representative as the report was not finalized). I would answer the question as such – others please feel free to wordsmith –

Based on the numerical model EPA uses sites can score between 0-100 with those scoring above 28.5 being eligible for the NPL. Given data and information on the numerous mines/mills draining into the Upper Animas, the site is expected to score above 28.5.

Good morning:

Jonathan Romeo of the Durango Herald wants to know what we would expect the HRS ranking for Silverton to be. Monica tells me a ranking was done in 2011. Do you know where I could find the results, please?

Thanks.

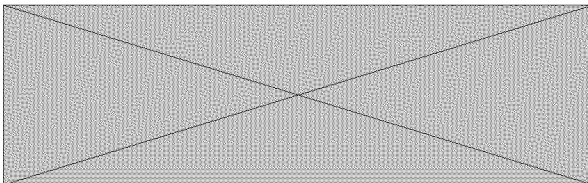

Warren
